

S&W M&P REAR SIGHT LASER

RL-MP

SPECIFICATIONS

Product	Rear Sight Laser for S&W M&P Pistols
Part #	RL-MP
MSRP	\$199.95
Compatible Firearms	Smith and Wesson M&P including 9, 40, & 45 Sub Compact and Full Size
Power Output	Class IIIA, 5mw
Laser Module	650nm

Batteries	4 x 377
Battery Life	*5 hrs. constant on, 10 hrs. pulse mode
Weight	1.2 oz., 34.02 g
Length	.85 in., 21.59 mm
Width	1.05 in., 26.67 mm
Height	.35 in., 8.89 mm
Range at Night	500 yd., 457.2 m

Introducing the Rear Sight Laser (RSL) – A ground-breaking new laser design incorporated into the rear sight. Compact size and revolutionary performance make the new RSL the most extraordinary system LaserLyte has ever produced. Easy-to-install and easy-to-operate, the new RSL offers a high-power laser with the benefit of not having to replace existing grips, internal stock parts or holsters.

The activation switch is a strategically placed button at the back of the slide that is easily activated by the thumb in a normal shooting position for left or right-handed shooters.

* Normal usage is defined as one minute on and one minute off. This test mimics actual usage where the unit is turned on and off and the battery is given time to automatically regenerate.

First press of the activation switch produces the constant on mode, second press produces pulse mode, and third press deactivates the laser. A small LED on the back of the laser indicates if the laser is on and what mode it is in.

The RSL is constructed from MIM 4650, nickel enriched high carbon steel, the same material used for most heavy-duty gun parts such as iron sights, hammers and levers. It is also black oxide, bead blasted for a non-reflective finish. The RSL will fit all Level 1 and 2 holsters.
