

SPECIFICATIONS

Product	Rear Sight Laser - Fits all XD's and XDM's
Part #	RL-XD/XDM
MSRP	\$199.95
Fits	Springfield XD and XDM
Dimensions	.85"(l) x 1.05"(w) x .35"(h)
Weight	1.2 oz

Battery	4 x 377
Run Time	1 hour Constant On 2 hours Pulse Mode
Power Output	Class IIIA, 5mw
Laser Module	650nm
Range at Night	500 yards

Introducing the Rear Sight Laser (RSL) – A ground-breaking new laser design incorporated into the rear sight. Compact size and revolutionary performance make the new RSL the most extraordinary system LaserLyte has ever produced. Easy-to-install and easy-to-operate, the new RSL offers a high-power laser with the benefit of not having to replace existing grips, internal stock parts or holsters.

The activation switch is a strategically placed button at the back of the slide that is easily activated by the thumb in a normal shooting position for left- or right-handed shooters. First press of the activation switch produces the constant on mode, second press produces pulse mode, and third press deactivates the laser. A small LED on the back of the laser indicates if the laser is on and what mode it is in.

The RSL fits all Springfield Amory XD/XDM pistols and is constructed from MIM 4650, nickel enriched high carbon steel, the same material used for most heavy-duty gun parts such as iron sights, hammers and levers. It is also black oxide, bead blasted for a non-reflective finish.

When mounted onto the pistol the RSL will fit all Level 1 and 2 holsters. Powered by four 377 batteries, commonly used in watches, that provide one hour of run time on constant on and two hours in pulse mode. LaserLyte also offers discounted batteries.
